Process Safety Management System

Development of the company HSE management system based on 22 process safety elements to comply with OSHA standards. Procedures will be accommodating all OSHA standards information. Following will be the main elements.

- ✓ Permit to work system
- ✓ Lock out tag out system
- ✓ Process Hazard Analysis
- ✓ Management of Change
- ✓ Contractor safety management
- ✓ Emergency response and planning
- ✓ Mechanical Integrity
- ✓ Incident reporting and investigation

HALAL Standard

The Halal food market, currently worth \$650 billion, is set to grow 35% over the next 20 years. With 1.6 billion consumers, it is considered to be one of the most untapped markets, worldwide.

Gap Analysis

If you are preparing for any International Management System Standard's Certification then where do you start? We start with a Gap Analysis to determine the gap between your current management system and an International Management System. A Gap Analysis is used to assess an organization's scope, readiness, and its resources for building the system. It also provides us with the data to develop a project plan for ISO implementation.

Second Party Audits

We offer technical and resource assessment audits to aid clients in the selection of vendors, providing confidence that the vendors selected will be capable of delivering as promised and that order placed will arrive on time and as specified. The goal of the process is to correct problems before they affect the customer or end user. Thus, it benefits a business or organization to avoid the risk of product recall, service failure or compliance issues, all of which can be very costly if not recognized in time.

HACCP Standard

HACCP certification instantly demonstrates to customers your commitment to producing or trading in safe food. This evidence-based approach can be particularly beneficial when you are subject to inspection by regulatory authorities or stakeholders. Demonstrating a real commitment to food safety through HACCP compliance can also transform your brand and act as an effective entry-to-market tool, opening up new business opportunities around the world.

Trusted Worldwide

We operate internationally, specializing in Pakistan and GCC countries (UAE, Saudi Arabia, Qatar, Oman, Kuwait, Bahrain), delivering top-quality services tailored to regional and global standards.
